

Are you  
happy with  
your school?

## Do you think the kids of LA are getting *enough*?

Are you satisfied  
with your child's  
education?

If not, you need to do something about it.  
Find out about the Schools LA Students Deserve  
and GET INVOLVED.

In Chicago, Seattle, British Columbia and Quebec, Canada, students, parents and teachers are fighting for a better education. Big forces with money are against us, but we can win and in these places they did. It's our turn. We want an education that can help students become self-motivated, critical-thinking, literate and math-literate. We want healthy, happy, engaged, powerful and successful students.

### ***We believe...***

- 1. Schools should help you!** Schools should serve students and their communities, including physically and mentally, helping them outside the classroom.
- 2. Your family should be involved!** Schools should honor and invite parent and community participation
- 3. What you need matters!** A school system that focused on students' needs, not on their standardized test scores, in order to help them get the skills and plans they need to succeed.
- 4. Your school needs MORE!** Schools should get the resources they need to succeed, including smaller class sizes, better facilities, and fully staffed schools.
- 5. Your voice is important!** Parents, students, and teachers should control all decision making in schools.
- 6. You need a safe school!** Campuses should be free of pollution, and free of police harassment.
- 7. You deserve a fair education!** Schools should give fair treatment and access to education for all students in the community, not moving out certain students.
- 8. Your community can succeed!** Money and resources should go to our schools and community and jobs and housing and transportation; not for prisons and corporations, or privatized schools.
